

17-01 System 3R WorkMasTer application

Serving WEDM machine and measuring machine

CMM is integrated in the cell and will be equipped from the robot. The yellow step protection mat safeguards the CMM and the operator against robot manipulations, when working on the CMM

CMM can be used as measuring machine and also as loading / unloading station for the cell. Tooling on the CMM is identical with the tooling on the RF440 WEDM machine.

System 3R WorkMasTer serving WEDM machine and measuring machine.

To work with Macro WEDM pallets, the chuck on the right side will be covered automatically with a protection pallet.

Magazines:

- Gripper for frames for Macro WEDM
- Single workpiece palletisation with Macro WEDM
- WEDM Macro frames

High-lights:

- All frames are equipped with an ID-Chip
- Cell controlled by Cellmanager with chip-ID
- All frames are set up with 2 single sided rulers
