

17-10 PN New hand control - Automation

A new and improved hand control is now introduced

system 3R

New hand control - Automation

A new and improved hand control is now introduced for the entire automation range – Transformer, WorkPartner 1+ and WorkPal Compact Servo.

Benefits:

- + Lighter weight and more ergonomical design.
- + Color display, with doubled screen resolution.
- + The buttons are easier to press.
- + Backwards compatible with the former hand control.
- + In compability mode the screen is black-and-white, updating the WMC4 firmware allows for color and higher resolution.
