

# 18-12 PN Spreitzer MZR Mechanical center-clamping

Powerful raw material clamping without pre-stamping

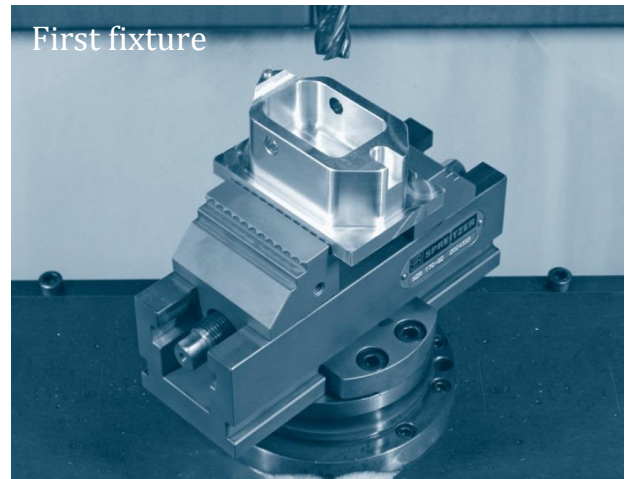

The new generation of center clamping vises for economical clamping of raw material.

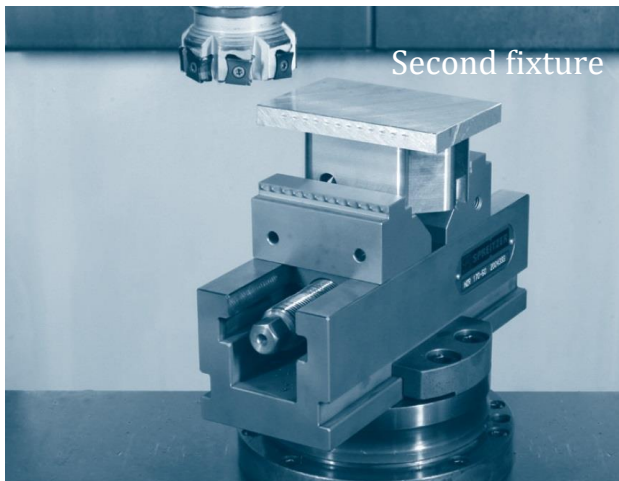

Pre-stamping from basic raw material is unnecessary and expensive. We have the ideal solution.

The center clamping vise type MZR has a favorable price for clamping raw material and is mainly applied to 4 and 5 axis milling machines.

The compact construction creates maximum spindle freedom with these 5-axis milling machines. The clamping range can easily be increased by the reversible

First fixture

Second fixture

- Stable, stiff and strong
- Rotating jaws for large and small workpieces
- Good spindle accessibility
- First fixture with grip jaws
- Second fixture with smooth jaws
- No need to pre-stamping
- Best result with materials up to 500 N/mm<sup>2</sup>
